Executive Summary

Atlantic Environmental Services, Inc. (AES) conducted a Phase I Environmental Site Assessment (ESA) for Berkley Group's proposed construction of a 199-foot monopole tower adjacent to 2119 Maya Lane, Logan, Ohio, in Hocking County. The subject is a proposed 100-foot by 100-foot lease area (the Site) for the construction of a wireless telecommunications tower facility. The project also includes an access and utilities maintenance easement from Maya Lane.

The objective of a Phase I ESA is to identify recognized environmental conditions for a subject site. A recognized environmental condition is defined in ASTM standard E-1527 as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property, or into the ground, groundwater, or surface water of the property."

A site visit was conducted on March 7, 2011. The site inspection of the property and surrounding area and the information provided to AES indicated the following:

- The Site is a proposed 100-foot by 100-foot lease area for the construction of a 199-foot monopole communications tower. The tower facility also has a proposed access and utilities maintenance easement from Maya Lane.
- The Site is located on a maintained lawn area adjacent to the Hideaway Hills Resort equestrian barn. The area surrounding the Site consists of additional woodlands, pastures, and residential use. The parent property is owned by the Hideaway Hills Resort.
- Water and sewer service are provided at the parent property by wells and onsite septic systems. South Central Power provides electrical service and Frontier Communications provides landline telecommunication service in the area. Topography at the Site slopes to the east toward a tributary to Rush Creek.
- AES contacted Mr. Randy Swetnam, General Manager of the Hideaway Hills Resort, to obtain further information about the historical use of the Site and parent property. Mr. Swetnam reported no knowledge of environmental conditions, regulatory actions, or use restrictions for the parent property. He also stated that he is not aware of any previous Phase I ESA for the subject property.

Phase I Environmental Site Assessment

Executive Summary

- The surrounding area was found to contain one mapped and several unmapped records in the state and federal environmental databases searched per ASTM standards. A location and status assessment of the mapped and unmapped records was conducted and it has been determined that they are not expected to affect the proposed lease.
- This Phase I Environmental Site Assessment was performed in conformance with the scope and limitations of ASTM Practice E 1527 for the subject lease. Any exceptions to, or deletions from, this practice are described in Sections 2.4, 3.5.2 and 3.6. This assessment has revealed no evidence of recognized environmental conditions in connection with the proposed lease.

1. Introduction

Atlantic Environmental Services, Inc. (AES) conducted a Phase I Environmental Site Assessment (ESA) for Berkley Group's proposed construction of a 199-foot monopole tower adjacent to Maya Lane in Logan, Ohio, in Hocking County. The subject is a proposed 100-foot by 100-foot lease area (the Site) for the construction of a wireless telecommunications tower facility. The project also includes an access and utilities maintenance easement from Maya Lane.

This Phase I ESA was conducted in accordance with the American Society for Testing and Materials (ASTM) standards for environmental site assessments for commercial real estate (E 1527-05). The objective of a Phase I ESA is to identify recognized environmental conditions for a subject site. A recognized environmental condition is defined in ASTM standard E-1527 as "the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of release of any hazardous substances or petroleum products into structures on the property, or into the ground, groundwater, or surface water of the property."

AES conducted a walk-through inspection of the property on March 7, 2011, to evaluate existing site conditions. A search of the United States Environmental Protection Agency (USEPA), Ohio state regulatory environmental databases, and local databases for the area was conducted by Environmental Data Resources, Inc. (EDR). The following sections discuss our research in detail.

Detailed Scope of Services

This assessment has been conducted in general conformance with ASTM E 1527.

The scope, completed by assembly of this report, consisted of the following.

- 1) Obtain and review federal, state regulatory, and local agency records for the site and immediate surrounding area for inclusion in databases listing known areas of environmental risk and/or contamination.
- 2) Perform a site inspection of accessible areas of the property to determine the presence or likely presence of recognized environmental conditions.
- 3) Review aerial photographs and other historical information for the site from readily available sources in order to evaluate changes in site vegetation, topography, and use.

- 4) Assess adjacent property use by observation from the subject site or from adjacent public roadways and contact local regulatory agencies, fire department, neighbors, and previous owners as may be productive in verifying historical use of the property.
- 5) Review site history of ownership, if provided by the user, to determine past uses that were, as described in E 1527-05, “likely to have involved the use, treatment, storage, disposal, or generation of hazardous substances or petroleum products.”
- 6) Prepare a written report documenting the results of the foregoing evaluations and form an opinion of the presence or likely presence of recognized environmental conditions at the site.
- 7) Services associated with evaluation of site buildings, if any, for asbestos, vapor intrusion, and radon are **excluded** from this scope of services.

Significant Assumptions

A Phase I ESA per ASTM standards is an assessment that is based on various assumptions. Assumptions are inherently made by the environmental professional in the site inspection, property research, and reporting tasks involved in completing the process.

In the inspection and research phase, the environmental professional has to assume that the conditions observed during the Site inspection are representative of the unaltered condition of the Site. In addition, the professional has to accept as true the information obtained from the past and present owners, regulatory officials, and other historical and publicly available sources.

In assembling all of the data obtained through the Site inspection and research procedures into a report, the professional also has to make assumptions about the extent, or lack of, impact that may have occurred from an apparent release of a petroleum product or hazardous waste. Further, assumptions have to be made concerning subsurface conditions and how the variables of soil characteristics and groundwater hydrology can affect the fate and transport of contaminants.

2. Background Information

2.1 Site Location/Land Use

The proposed Site is located in on a lawn area adjacent to a horse barn and paddocks. Areas surrounding the Site consist of other woodlands and pasture and residential use. The Site and parent property are located northwest of Logan, Ohio.

Land use in this area consists of residential use. A vicinity and topographic map for the Site are included in Appendix B.

2.2 Environmental Setting

Data describing the environmental setting of a subject site is used for assessing the potential for migration of contaminants from adjoining properties or from within a parent property. Such data typically includes topographic and geologic sources that can be used to make judgments concerning the transport and fate of contaminants in air, soil, and ground water.

Soils at the Site are classified on the Web Soil Survey as WeC – Wellston silt loam, 6 to 15 percent slopes and are described as follows: This component is found on hills. The parent material consists of residuum. The depth to bedrock (lithic), is 40 to 72 inches and the natural drainage class is well drained. Water movement in the most restrictive layer is very low. The available water to a depth of 60 inches is high and the shrink-swell potential is low. This soil is not flooded or ponded and there is no zone of water saturation within a depth of 72 inches. These soils have an acidic reaction with a pH range from 4.5 to 6.5. The risk for corrosion is moderate for uncoated steel and high for concrete.

The Site is in the Bremen, Ohio, USGS topographic quadrangle. The surface elevation at the Site is approximately 965-feet above mean sea level (msl). Topography at the Site is sloped to the east toward a tributary to Rush Creek.

2.3 Facility Operations

The proposed tower facility will operate as an unmanned installation designed to support wireless telephone service equipment.

2.4 Historical Overview

A chain-of-title for the subject property, conforming to ASTM standards, is to be provided by Berkley Group. Title research was therefore not included in the scope of this assessment.

AES contacted Mr. Randy Swetnam, General Manager of the Hideaway Hills Resort, to obtain further information about the historical use of the Site and parent property. Mr. Swetnam reported no knowledge of environmental conditions, regulatory actions, or use restrictions for the parent property. He reported no previous Phase I ESA for the Site. Mr. Swetnam also reported no knowledge of aboveground or underground fuel tanks, dumping, burning, or burial of hazardous wastes or petroleum materials on the property. He also stated that there are no environmental liens against the parent property.

AES contacted Chief Robertson of the Logan Fire Department to obtain historical information on fire calls, spills, or HAZMAT responses at or near the Site. Chief Robertson reported that he is not aware of any HAZMAT responses to the subject property during his 25-years of service in the area. He also stated that the Hideaway Hills Resort is in the Bremen-Rush Creek Fire District. AES contacted Lieutenant Todd Berry at the Bremen-Rush Creek Fire Department. Lieutenant Berry has not been available for interview as of the date of this report. AES will amend this report if Lieutenant Berry responds with information on environmental conditions at or near the Site.

Sanborn Historical Map research was conducted for the area of the Site, though no map coverage was available.

2.5 Review of Aerial Photographs

Aerial images from 1994, 2004, 2006, and 2009 provided by Google Earth were reviewed. These images show the area of the proposed tower compound as a lawn area occupied by several satellite dishes, a tower, and equipment building. The adjoining areas appear to consist of additional undeveloped woodlands and fields, and residential use of the Hideaway Hills Resort.

An aerial image from 2006 provided on the Web Soil Survey was also reviewed. This image shows the area of the proposed Site as described above.

3. User Provided Information

3.1 Title Records

Title records for the subject parcel were not provided by the user for review under the scope of this assessment.

3.2 Environmental Liens or Activity and Use Limitations

The user or current property owner have provided no knowledge of environmental liens against the property and no activity or use limitations other than local zoning ordinances and building codes.

3.3 Specialized Knowledge

No specialized information or knowledge has been provided by the user for the subject property.

3.4 Valuation Reduction for Environmental Issues

A valuation reduction has not been included as part of the scope of this assessment.

3.5 Owner, Property Manager, and Occupant Information

The subject property is currently owned by the Hideaway Hills Resort. Mr. Randy Swetnam was interviewed as described in Section 2.4.

3.6 Reason for Performing Phase I

This Phase I ESA has been performed to identify recognized environmental conditions for the subject site. The user is interested in determining the likelihood of RECs at or near the subject property and assessing the potential to affect a small lease area on the parent property that will be used for a wireless telecommunications tower facility.

3.7 Other

No other user provided information is noted.

4. Site Inspection

4.1 Inspection

A visual inspection of the Site and surrounding area was made on March 7, 2011. The investigation involved a walk-through of the Site and surrounding area to obtain information on the presence or likely presence of recognized environmental conditions at or near the property.

The site inspection included a walk of the access to the Site across the parent property, as well as a survey of the surrounding properties from public roads.

4.2 Utilities

Water service was not evident in the area of the Site but is provided in the area by wells. Frontier Communications provides landline telecommunication service and South Central Power provides electrical service in the area.

4.3 Wastewater and Stormwater

Sewer service is not in use at the Site and is available to the properties in the area by onsite septic systems. Stormwater runoff onto and across the Site is from the lawn and gravel parking areas at the horse barn and is expected to follow natural drainage patterns to the east toward a tributary to Rush Creek.

4.4 Petroleum and Chemical Materials

There was no evidence of any petroleum or chemical materials at the Site.

4.5 Solid Waste

4.5.1 Non-Hazardous Waste

No non-hazardous waste was observed at, or adjacent to, the Site.

4.5.2 Hazardous Waste

No hazardous waste was observed at, or adjacent to, the Site. Asbestos survey for on-site buildings, if any, was not included in the scope of this assessment.

4.6 Radon

A radon survey was not in the scope of this assessment.

4.7 Polychlorinated Biphenyls (PCBs)

Pole-mounted transformers were observed on the electrical service lines located in the area. These transformers appeared to be in good condition with no evident leaks. The transformers are not located such that they would be expected to affect the proposed lease area. Most power companies report that they no longer utilize transformers containing Polychlorinated Biphenyls (PCBs).

5. Regulatory Agency Database Review

5.1 Database Listing

AES subcontracted with EDR to conduct a search of applicable and accessible federal, state, and local databases within a designated radius of the Site. This database search is designed to determine whether the Site or neighboring sites have a regulatory history of environmental problems that could have an adverse impact on the subject property.

The EDR report is included as Appendix C. It contains a listing of the relevant databases researched and a brief explanation of the type of information contained in each database.

5.2 On-Site Potential Sources of Contamination

EDR reported no on-site potential sources of contamination.

5.3 Off-Site Potential Sources of Contamination

EDR reported one mapped and several unmapped, off-site potential sources of contamination. The mapped record is separated from the Site by topography and distance such that it would not be expected to affect the proposed tower facility lease.

The unmapped records were reported by EDR with limited and incomplete address information. An examination of both the estimated location and listed status of these records was conducted to determine if they are likely within the ASTM radii of being a potential source of contamination. The street addresses listed for each unmapped record were cross-referenced with the streets that intersect within a one-mile radius of the Site.

Based on this analysis of the limited address information provided and the reported status of each unmapped record, it has been determined that they are not likely to affect the proposed lease. See Appendix C for details on each record listing.

6. Summary of Findings and Opinion

The site inspection of the property and surrounding area and the information provided to AES indicated the following:

- The Site is a proposed 100-foot by 100-foot lease area for the construction of a 199-foot monopole communications tower. The tower facility also has a proposed access and utilities maintenance easement from Maya Lane.
- The Site is located on a maintained lawn area adjacent to the Hideaway Hills Resort equestrian barn. The area surrounding the Site consists of additional woodlands, pastures, and residential use. The parent property is owned by the Hideaway Hills Resort.
- Water and sewer service are provided at the parent property by wells and onsite septic systems. South Central Power provides electrical service and Frontier Communications provides landline telecommunication service in the area. Topography at the Site slopes to the east toward a tributary to Rush Creek.
- AES contacted Mr. Randy Swetnam, General Manager of the Hideaway Hills Resort, to obtain further information about the historical use of the Site and parent property. Mr. Swetnam reported no knowledge of environmental conditions, regulatory actions, or use restrictions for the parent property. He also stated that he is not aware of any previous Phase I ESA for the subject property.
- The surrounding area was found to contain one mapped and several unmapped records in the state and federal environmental databases searched per ASTM standards. A location and status assessment of the mapped and unmapped records was conducted and it has been determined that they are not expected to affect the proposed lease.
- This Phase I Environmental Site Assessment was performed in conformance with the scope and limitations of ASTM Practice E 1527 for the subject lease. Any exceptions to, or deletions from, this practice are described in Sections 2.4, 3.5.2 and 3.6. This assessment has revealed no evidence of recognized environmental conditions in connection with the proposed lease.

7. Qualifications

Jon Pruitt has eighteen years of experience in environmental assessment, compliance, and engineering. His master's degree studies in environmental systems engineering were concentrated in physiochemical treatment, waste management and risk assessment. In his professional career he has been involved in a number of industrial and municipal wastewater design projects and has completed numerous NEPA compliance reports and Environmental Assessments. Project experience includes ASTM Standard Phase I and II Environmental Site Assessments, having completed Phase I Assessments for hundreds of properties. These projects have included numerous undeveloped properties proposed for residential subdivisions or industrial business parks, commercial, utility, and industrial properties. He also has experience with industrial and municipal solid waste projects, wetlands delineation, asbestos inspection, construction management, as well as project management in Wireless Telecommunications and Land Development.

8. Limitations

The evaluations presented in this Phase I ESA are based exclusively on information provided by Berkley Group, Environmental Data Resources, Inc., the property owner, other publicly available sources, and observations made during the site inspection. No quantitative field activities were conducted; no samples were collected; and AES performed no laboratory analyses. In preparing this report, AES has accepted as true the information provided by the property owner and other publicly available sources. AES warrants that the services performed were conducted in a competent and professional manner in accordance with sound consulting practices and procedures. AES cannot warrant the actual site conditions described in this report beyond matters amenable to visual confirmation within the limits of this site inspection program or beyond the date of our site inspection.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

DERR: The DERR database is an index of sites for which Ohio EPA maintains files. It includes sites with known or suspected contamination, but a site's inclusion in the database does not mean that it is now or has ever been contaminated.

A review of the DERR list, as provided by EDR, and dated 02/22/2011 has revealed that there is 1 DERR site within approximately 1 mile of the target property.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

EPA Region 10 Telephone 206-553-8665	

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/31/2010	Source: EPA
Date Data Arrived at EDR: 01/13/2011	Telephone: N/A
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 01/13/2011
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 11/30/2010	Source: EPA
Date Data Arrived at EDR: 12/30/2010	Telephone: 703-412-9810
Date Made Active in Reports: 02/25/2011	Last EDR Contact: 03/01/2011
Number of Days to Update: 57	Next Scheduled EDR Contact: 06/13/2011
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA's Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 12/10/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/11/2011	Telephone: 703-603-8704
Date Made Active in Reports: 02/16/2011	Last EDR Contact: 01/11/2011
Number of Days to Update: 36	Next Scheduled EDR Contact: 04/25/2011
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/28/2010	Source: EPA
Date Data Arrived at EDR: 12/01/2010	Telephone: 703-412-9810

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010
Date Made Active in Reports: 05/17/2010
Number of Days to Update: 87

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 02/17/2010
Date Data Arrived at EDR: 02/19/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal institutional controls / engineering controls registries

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 01/05/2011	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/14/2011	Telephone: 703-603-0695
Date Made Active in Reports: 01/28/2011	Last EDR Contact: 03/14/2011
Number of Days to Update: 14	Next Scheduled EDR Contact: 06/27/2011
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2010	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/07/2011	Telephone: 202-267-2180
Date Made Active in Reports: 03/21/2011	Last EDR Contact: 01/07/2011
Number of Days to Update: 73	Next Scheduled EDR Contact: 04/18/2011
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

DERR: Division of Emergency & Remedial Response's Database

The DERR listings contains sites from all of Ohio that are in the Division of Emergency and Remedial Response (DERR) database, which is an index of sites for which our district offices maintain files. The database is NOT a record of contaminated sites or sites suspected of contamination. Not all sites in the database are contaminated, and a site's absence from the database does not imply that it is uncontaminated.

Date of Government Version: 02/22/2011	Source: Ohio EPA, Div. of Emergency and Remedial Response
Date Data Arrived at EDR: 02/22/2011	Telephone: 614-644-3538

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Licensed Solid Waste Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 01/17/2011

	Data Release Frequency: Semi-Annually

HIST INST CONTROLS: Institutional Controls Database

"Institutional control" is a restriction that is recorded in the same manner as a deed which limits access to or use of the property such that exposure to hazardous substances or petroleum are effectively and reliably eliminated or mitigated. Examples of institutional controls include land and water use restrictions. This database is no longer updated or maintained by the state agency.

Date of Government Version: 05/10/2005	Source: Ohio EPA
Date Data Arrived at EDR: 04/06/2006	Telephone: 614-644-2306
Date Made Active in Reports: 05/04/2006	Last EDR Contact: 06/02/2008
Number of Days to Update: 28	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

HIST ENG CONTROLS: Operation & Maintenance Agreements Database

Volunteers that complete a voluntary action that relies on the ongoing operation and maintenance (O&M) of an engineered control to make the site protective (e.g. cap systems and ground water treatment systems) must enter into a legally binding agreement with the Ohio EPA before the director issues a covenant not to sue. This O&M Agreement must describe how the remedy is constructed and how it will be monitored, maintained and repaired. It also lays out inspection opportunities for the agency. Companies must document that they have the financial capability to operate any remedy relied on, before the agency will agree to enter into the O&M Agreement. The statute requires that the agency be notified of any change in ownership. This database is no longer updated or maintained by the state agency.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

SPILLS: Emergency Response Database

Incidents reported to the Emergency Response Unit. The focus of the ER program is to minimize the impact on the environment from accidental releases, spills, and unauthorized discharges from any fixed or mobile sources. Incidents involving petroleum products, hazardous materials, hazardous waste, abandoned drums, or other materials which may pose as a pollution threat to the state's water, land, or air should be reported immediately. Not all incidents included in the database are actual SPILLS, they can simply be reported incidents.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA

USD: Urban Setting Designation Sites

A USD may be requested for properties participating in the VAP when there is no current or future use of the ground water by local residents for drinking, showering, bathing or cooking. In these areas, an approved USD would lower the cost of cleanup and promote economic redevelopment while still protecting public health and safety. If these USDs were to be approved, the ground water cleanup or response requirements for the areas could be lessened. The Ohio EPA director may approve a USD request based on a demonstration that the USD requirements are met and an evaluation of existing and future uses of ground water in the area. The Ohio EPA director's decision on approval or denial of the request is needed before cleanup requirements for the site can be determined.

Date of Government Version: 02/14/2011

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.

Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Child Day Care Facilities

Source: Department of Job & Family Services

Telephone: 614-466-6282

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Source: Department of Natural Resources

Telephone: 614-265-1044
